

NEWS RELEASE: 7/2/2015

Achieving Unparalleled Esthetics with Imagine™ HT Zirconia & Jensen XT Zirconia

North Haven, Conn. –

Jensen Dental's Digital Experts made a stop at the Red Lion Hotel Anaheim in California last week to show attendees how to achieve unparalleled esthetics with full contour, monolithic anterior and posterior restorations using Imagine™ HT Zirconia and Jensen XT Zirconia.

During a hands-on workshop, Jensen's Ryan Gillespie walked attendees through a systematic shading, staining and glazing process proven to produce highly predictable esthetic outcomes with Imagine™ and Jensen XT. Attendees learned how to position these digital materials in their lab's portfolio to provide Doctor's with the translucency, strength and durability they desire. The event ended with a discussion on digital trends and an overview of Preciso, Jensen's Digital CAD/CAM solution of fully integrated equipment, software, education and support.

JENSEN's Imagine™ Zirconia is as translucent as pressed all ceramic, twice the strength of lithium disilicate and can be used for bridges up to three-units. JENSEN XT is a highly esthetic, high strength zirconia exhibiting superior millability, fit and shade fidelity regardless of thickness. XT is ideal for full arch, long span bridges or single crowns.

About Jensen Dental

For over 35 years, Jensen Dental has helped dental laboratories and dentists create beautiful restorations more efficiently by offering a full suite of innovative solutions backed by world-class education and support. Jensen provides quality products and services including digital CAD/CAM systems and digital materials, alloys, refining, porcelain, investment, furnaces and more.
