## **Willi Geller Creation Porcelain**

JENSEN DENTAL's Willi Geller Creation porcelain offers a high level of esthetics. The powders handle well, offer exact shade matching and simulate many of the same optical properties found in natural teeth. Available for traditional metal ceramics, zirconia, alumina, low-fusing, all-ceramic pressed and pressed-to-zirconia applications, the system can be used in a production setting or by those who customize their buildups using multiple powders.

## **InSync ZR Layering System**

JENSEN DENTAL's InSync ZR Layering System offers a natural translucency and fluorescence that produces consistent, lifelike, esthetic zirconia and titanium restorations. The system features a low-shrinkage, low-fusing porcelain that is easy to handle and offers a consistent shade match straight out of the bottle with simple layering techniques.
